

# Trip to the Tashkent Polytechnic Museum

Today, science and technology are developing to new heights. Every day, humanity is provided with more favorable conditions and opportunities. However, not everybody is fully aware of his beginning. What are the automotive industry's priorities? What was the appearance of tractors in the first few centuries ago? How do they move? You will find answers to these questions in the Tashkent Polytechnic Museum ...

On April 12, 2019, students of Group 17 of "Hydrology (Watershed)", of Faculty of Hydromelioration, visited the Tashkent Polytechnic Museum under the guidance of assistant of the department "Hydrology and Hydrogeology" S. Mansurov. .

During the visit, the guests got acquainted with the history of transport development, science and technology, inventions of the great scientists, the history of the world automobile industry, the History of Uzbekistan Automotive Industry and others. At the same time, the first automobiles of the General Motors conveyor plant in various years have come to see the gift of the first president of Uzbekistan, Islam Karimov.

**Report by S.Mansurov, an assistant of department of Hydrology and Hydrogeology**

**R.Jumaniyozov, the press secretary of the institute**
