

Erdifying life

✘ Trying to make progress along the path of life. Someone passes through the pillars successfully and others do not. Excessive passages require vital experiences, intelligent and mature human qualities. The person who has these qualities is truly happy. Arifjanov Aybek Mukhamedjanovich, who has been working in the department of Hydraulics and Hydroformatics for many years, welcomes their blessed 60 year old on January 4.

Aybek Mukhamedjanovitch is not only a scientist, a generous, incomparable mentor-trainer. As a leading scientist, for many years now, he has been working at the institute, and seven doctors have been trained under his scientific supervision, and now he works as a leading specialist in the industry. Their author published 4 monographs, more than 10 textbooks, manuals, more than 300 scientific works. The results of scientific researches on hydraulic processes in rivers and river basins of Uzbekistan, protection of hydraulic structures from flooding and the results of scientific researches in Greater Fergana, Big Andijan, Karshi, Lower Amudarya, Mirishkor and others serve as a program in the field of water economy. It is noteworthy that their scientific designs were awarded not only in the Republic but also internationally. Especially, the achievements of "The best educational literature of the year" and "The best pedagogue of the year" testify to the fact that it is a vigorous child of our people.

Dear Aybek Muhamedjanovich!

The respect of peoples can not be inherited. Only those who have lived their whole lives honestly, selflessly, will be able to survive. All of our team, friends, and relatives are proud of you because you are such a person. We wish you good health and great success in your future activities, which lead you to a long life, health and prosperity of our country!

**With sincere respect and esteem, the colleague of Tashkent Institute of Irrigation and
Mechanization of Mechanical Engineers**

Press Secretary of the Institute
