

Tradition of giving books

✖ A great deal of attention is paid to raising the literary culture of the younger generation, deeply rooted in the secrets of science, keeping the books with them, and raising them spiritually.

It is well-known that on March 19 this year video conference was held under the chairmanship of our President Sh.Mirziyoev to discuss the issue of raising the interest of young people in reading books for raising their spirituality and meaningful organization of their leisure time. At the meeting, the President pointed out that each leader had given his books to a school library he was studying, and that such a noble initiative would contribute to the development of reading and would have a positive impact on the upbringing of our children.

Supporting this initiative of the President of the Republic of Uzbekistan, Dean of the Faculty of Hydroelementology A. Fatkulloyev handed over books to the general school # 44 in Bustanlik district of Tashkent region. Indeed, the book is a key element in the development of the free world of the human mind, the enlargement of the worldview, the reasonableness, the spiritual world. The reader's mind is filled with wisdom, spiritual enlightenment, and maturity.
