The work plan of the activities conducted in the student scientific society (scientific circles, laboratory) of the "Hydrology and Hydrogeology" department:

Today, the student scientific society "Young hydrologist" operates in the department. The professors and teachers of the department are cooperating with the following students on approved scientific topics:

1. Assessment of the hydrological regime of Uzbekistan's reservoirs and their effective use. Scientific leader: associate professor Gapparov F.A.
2. Hydrological regime of Chervok reservoir and its seasonal management. Scientific supervisor: associate professor Nazaraliyev D.V.
3. The scientific basis of the development of measures to reduce the useless volume in water reservoirs. Scientific leader: associate professor Nurjanov S.E.
4. Assessment and forecasting of the hydroecological regime of reservoirs. Research supervisor: basic doctoral student Hamrokulov J.S.
5. Development of measures to prevent silting in seasonal reservoirs. Scientific supervisor: associate professor Akmalov Sh.B.
6. Development of water balance equation of Tashkent irrigation district. Scientific leader: assistant Kadirov S.M.

In the circle of the student scientific society, classes are held in rooms 105-106 of the G building based on the plan approved by the head of the department.
