To date, the department under the guidance of Associate Professor A. Atazhanov is conducting a course "Young Mechanic".

Consulting hours are held every Wednesday and Friday at 15.00 in auditorium G-301.

The "Young Mechanic" course conducts its activities on the basis of the following topics for research work:

1. Study and analysis of wear of the impeller of centrifugal pumps.
2. Development of recommendations for the organization of efficient operation of reclamation equipment.
3. Justification of the parameters of the working body of the bulldozer GLGTY 160 with a rotary blade.
4. Determination of indicators of the cleaning working body of drainage pipes.
5. Justification of the parameters of the working body for cutting and harvesting reeds in collectors.
6. Determination of indicators of subsoil irrigation technology with application on cotton.
