

Clubs

"Meliorator" club is working under the department. PhD, associate professor Abduraimova D.A. is leading this club.

28 talented students conducted scientific activities in the "Meliorator" club of the "Irrigation and melioration" department. The club of our department is held every Tuesday at 15.00. Current problems observed today are discussed in the circle and opinions are exchanged on their solutions. At the same time, preparations are made for the Olympiads in our subjects..

2 of our students, working in the club, participated in the first round of the Olympiad in the subjects "Irrigation and Reclamation" and "Hydrotechnical Reclamation in Agriculture" and took the 1st and 2nd places. Currently, they are preparing for the 2nd stage of the Olympiad between the Republic's Higher Education Institutions.

At the same time, professors and teachers of our department organize trips to the "Educational-Production Center", which is considered a scientific research object of our institute, together with talented students.
